ET Indoor Triathlon Scoring Method

The athlete that goes the furthest distance in each segment gets the highest point score for that segment. The maximum number of points for each segment is determined by the total number of racers. Example, if the race has 23 athletes, then the fastest runner gets 23 points, next fastest runner gets 22, and so on. Then the points for each segment are added up. The athlete with highest total points gets first place overall. Masters division is 40 years old and higher. Awards are given for both the top 3 male/ female overall, and the top 3 male/female in the Masters division.
